**MRX-15** 

## **TOTAL CONTROL**

#### **Introduction**

The MRX-15 Advanced Network System Controller controls is designed to meet the needs of large residential or small commercial environments.

Only **Total Control** software, products, and user interfaces are supported by this powerful device.

This device is **not compatible** with Total Control 1.0 legacy products.

### **Features and Benefits**

- **Stores and issues commands** for all IP, IR, RS-232, Relays, Sensors, and 12V Triggers controlled devices.
- Provides **two-way communication** with **Total Control** user interfaces. (remotes and keypads).
- Easy rack-mounting via the included rack mounting ears.

### Parts List

The MRX-15 Advanced Network Controller includes:

- 1x MRX-15 System Controller
- 1x Adjustment Tool

• 1x AC Power Adapter

• 1x Ethernet Cable

• 1x Power Cord

• 8x IR Emitters 3.5mm (standard)

**MRX-15** 

## **TOTAL CONTROL**

### **Front Panel Description**

The front panel consist of two (2) indicator lights that illuminate during usage:

- 1. Power: Indicates that the MRX-15 is powered when illuminated.
- **2. Ethernet:** When the device has a valid Ethernet connection the indicator light remains a solid blue.
- 3. **Reset:** Press once to power cycle the device.

**MRX-15** 

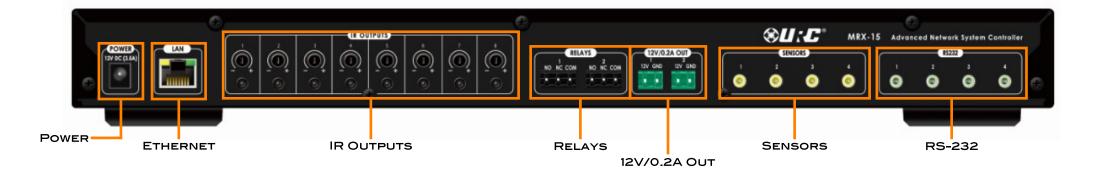

## TOTAL CONTROL

#### **Rear Panel Description**

Below are the rear panel ports:

- 1. **Power:** Attach the included power supply here.
- **2.** LAN: RJ45 10/100/1000 Ethernet port.
- **3. IR Outputs:** Eight (8) standard 3.5mm IR emitter ports with individual output level adjustment screws.
- 4. Relays: Two (2) programmable relays at NO, NC, or COM.

- **5. 12V OUT:** Two (2) programmable outputs. Each may be programmed to turn on, off, or momentarily toggle.
- **6. Sensors:** Four (4) sensor ports that allow the programming of state dependent and triggered macros. Compatible with all URC sensors.
- **7. RS232:** Four (4) RS-232 ports. Supports TX, RX, and GND connections for wired two-way communication.

### **Installing the MRX-15**

The MRX-15 Advanced Network System Controller can be installed almost anywhere in the home.

Once physically installed, it requires **programming by a certified URC integrator** in order to operate local equipment using IP (Network), RS-232 (Serial), IR (Infrared), or relays. All cables must be connected to their respective ports at the rear of the device.

### **Network Installation**

- 1. Connect an **Ethernet cable** (**RJ45**) to the rear of the MRX-15 and the onto an available LAN port of the network's local router (Luxul preferred).
- 2. A certified URC integrator is **required** for this step, configure the MRX-15 to a DHCP/MAC reservation within the local router.

## **TOTAL CONTROL**

#### **Connecting IR Emitters**

IR emitters are used to communicate to AV devices such as cable boxes, televisions, blu-ray players and more.

1. Plug IR Emitters (eight (8) supplied in the box) into any of the eight (8) IR outputs available on the rear of the MRX-15.

All IR outputs include an adjustable sensitivity dial. Turn this dial to the right to increase the gain and to the left to decrease it.

2. Remove the **adhesive covering from the emitter** and place it over the **IR receiver** of the 3rd party device (cable box, television, etc.).

#### MRX-15 Owner's Manual

### **Connecting RS-232 (Serial)**

The MRX-15 can operate equipment via RS-232 communication. The allows discrete serial commands to be triggered from the Total Control system.

Connect RS-232 device using URC's proprietary RS-232 cables. These use either male or female DB-9 connections with standard pin-outs.

- 1. Connect the 3.5mm into the RS-232 Output available on the MRX-15.
- 2. Connect the Serial connection onto the **available port** on the 3rd party device, such as AVRs, Televisions, Matrix Switchers, and other devices.

## TOTAL CONTROL

### **Specifications**

Network: One 10/100/1000M RJ45 Ethernet port (two LED indicators)

Weight: 73.83 oz

**Size:** 17.83" (W) x 2.03" (H) x 8.3" (D)

**Power:** DC 12V/3.3A

12V/.2A: Two (programmable)

IR Outputs: Eight standard 3.5mm IR emitter ports (variable)

RS-232: Four supporting TX, RX, and GND

Sensors: Four programmable sensor ports

End User Agreement

The terms and conditions of the End User Agreement available at <u>https://www.urc-automation.com/legal/end-user-agreement/</u> shall apply.

### Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
