

URC is redefining contemporary luxury and innovation with the new TRC-1120 premium, handheld remote. Its sleek, compact design and elegant aesthetic create a statement piece for your smart home or commercial environment. The vibrant, 2-inch capacitive color LCD screen delivers high-resolution graphics and ease of use. With enhanced processing speed, the TRC-1120 enables quick response to simple one-touch or voice commands, and the built-in mic and speaker communicate seamlessly via Amazon Alexa, Comcast Xfinity or Apple TV. It also communicates with Ring doorbells and cameras with live video, two-way voice and camera pop-up. Fully backlit hard buttons and a pickup sensor wakes the TRC-1120 to ensure a premium user experience. Compatible with all URC Total Control integrations, the TRC-1120 can control a single-room residential or commercial URC system. With its intuitive interface and advanced features, managing home entertainment, lighting, climate, and more... has never been easier. Elevate everyday experiences with URC's new TRC-1120!
